

Essential Stock Room

Essential chemicals needed in every laboratory, from technical grade to high purity reagents and solvents for the day-to-day lab work. All products are available from convenient off-the-shelf packs to high-volume delivery systems.

Categories:

- Acids and bases
- Analytical reagents
- Buffers and solutions
- Inorganics
- Solvents
- Standards

Analytical Sciences

Fisher Scientific offers cutting edge, ultra-high performance liquid chromatography (UHPLC) and liquid chromatography/mass spectrometry (LC/MS) grades to support these demanding methods. In addition, we carry specialty grades for nuclear magnetic resonance (NMR), inductively coupled plasma (ICP), infrared (IR) and atomic absorption (AA) spectroscopy as well as gas chromatography (GC). Our chemical offering also includes a full range of analytical standards.

Categories:

- High purity solvents
- High purity acids and bases
- Karl Fischer reagents
- Buffers and solutions
- Certified Reference Materials (CRMs)
- Analytical standards
- pH and conductivity standards
- Chromatography reagents
- Chromatography columns, sample handling and sample prep consumables
- Inorganics
- Spectroscopy grade products
- Anhydrous solvents and reagents

Organic Synthesis, Inorganic Chemistry and Material Science

Fisher Scientific offers all the ingredients you need for synthetic organic chemistry, inorganic and organometallic chemistry. Our portfolio includes the most frequently chosen organic and inorganic compounds at different purities and pack sizes for your convenience

Categories:

- Organic building blocks
- Reagents
- Catalysts
- Ultra-dry solvents and solutions
- Metals, metals oxides and other derivatives
- Ultrapure metals and semiconductor materials
- Organic and inorganic salts
- Coordination complexes and organometallics
- Silica and resins for product purification and isolation

Life Sciences Essentials

A selection of essential products for your life science research as a perfect complement to our other market-leading brands for molecular, cell biology and protein research applications. We have over 1000 life science essentials products in the following categories:

- High purity buffers, solvents and reagents
- Cell culture media ingredients
- Enzymes, nucleic acids and reagents for molecular biology
- Reagents for peptide/protein synthesis, purification and analysis
- Histology reagents
- Antibiotics and other bioactives

Bulk and Custom Chemical Products

Fisher Scientific supplies a broad selection of bulk and semi-bulk chemicals that can be fully customised to meet your research and development needs. Our chemicals are manufactured under a detailed and robust quality management programme, and are shipped with lot-specific Certificates of Analysis and Material Safety Data Sheets.

Mixtures and blends

Dedicated mixing facilities produce consistent, high purity custom solvent blends and aqueous solutions.

Tailored specifications and testing services

Products with additional or alternate specifications to meet specific application needs. In-house laboratory and quality control teams, and accredited external partners, provide quick and accurate results for custom method development, validation and execution.

Customised packaging

Innovative, safe, convenient and environmentally-friendly packaging options in any size, compliant with relevant regulations.

Returnable drums and refillable delivery systems

- Eliminate repeated solvent testing and bottle rinsing
- Enhanced solvent safety - prevent unwanted solvent flow
- Reduced storage space and packaging waste

Custom synthesis and manufacturing services

Large scale blending, distillation, crystallisation and filling capabilities allow us to manufacture products tailored to your specific requirements, including custom aqueous and non-aqueous solutions.

High-quality, custom chemicals for research, pilot-scale and full-scale production — all with full confidentiality.

Honeywell
Research Chemicals

Fisher Scientific is your convenient single stop for laboratory products and consumables. Among over 1 million products, choose from the market's biggest chemical portfolio, with over 80,000 chemicals.

Find all the market leading brands, such as Fisher Chemical, Acros Organics, Alfa Aesar, Honeywell and cutting-edge product brands, such as Hydranal, AcroSeal, Chromasolv, Optima. With a full EMEA coverage, we speak your language and understand your needs, working every day to deliver the product you want exactly when you want it.

Resources

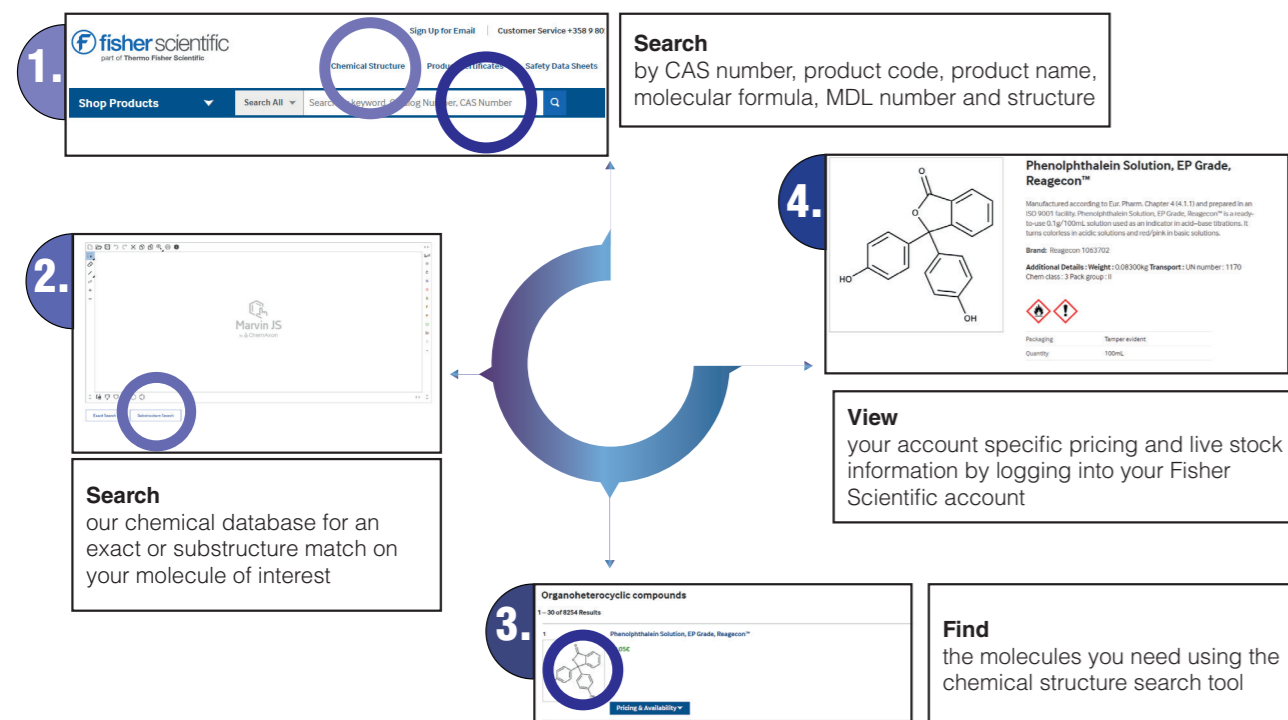

Dedicated Digital Resources:

World class experience for our Chemicals customers

- Customer-dedicated online catalogues
- Brand-specific web pages
- Downloadable technical and application resources
- Product and application focus
- Easy access to SDS sheets and Certificates of Analysis

Chemicals Structure Search

Find the reagents, catalysts and other chemicals you need

IN-STOCK ITEMS ARE SHIPPED THE SAME DAY YOUR ORDER IS RECEIVED

Quality

- A Quality Management System is in place at each operational site to consistently meet quality and regulatory requirements according to customer needs.
- Our Quality Programme includes change notifications and traceability, including quality agreements and confidentiality agreements as needed.
- Lot sequestering capabilities.
- Our Supplier Control Programme includes Qualification, Certification, Review and Auditing.

Logistics

We operate under a global supply chain footprint with warehouses worldwide, multiple dangerous goods storage locations, and globally harmonised systems providing assurance of supply. Our sourcing team has global reach and will work with you to understand your process requirements. As such, we offer a lean single-supplier service, with reliable management of multi-product supply projects.
